ABSTRACT

"TORNEO-the web assistant" is a tournament management system in which the tournaments are coordinated. In this project, there are 4 users Teams, Club, Sponsors and Admin. Club conduct tournament by registering into "TORNEO" through their home page. After admin approved tournaments, they are sent to sponsor's page. Once sponsors are willing to provide sponsorship they register for it and after approving this sponsorship the tournament details are notified to all other registered teams. The team applies for the tournament. After the team applies for tournament, club schedules the match. The match schedule is viewed by the team. After match, the result is also published in the site. Guest user can find the upcoming tournament and book the tickets.

ADMIN

Admin controls overall management of the system. Admin approves or rejects all users (sponsors and teams) and also the tournament and sponsorship. The users are approved on the basis of their aadhar identity. While doing registration to the site "TORNEO" users must upload their aadhar details for prove himself. Admin also approves the tournament registered by the club. After the approval the tournament details are sent to the registered sponsors. The sponsors can register their sponsorship. These sponsorship details are approved by the admin and then the approved tournaments are notified to the team who registered in the site. Now they can apply for the tournament. Also after the date of tournament the notifications about the tournaments are cleared from the applied team's home pages. Admin can view the profile of registered teams and sponsors. He can also view the details of the tournament and the details of applied teams. Admin can maintain the details of tournament history and upcoming tournaments. The details include tournament details like the venue, from date, to date, location, contact numbers and coordinating club details and also the details of the applied teams. Details of applied teams includes captain details and player details. There is also a report generator functionality for admin. So that he can print the details of a team such as team name, captain name and team players details. Thus hectic manual procedures can be avoided and also we can reduce the paper works.

TEAM

Teams must register into website "TORNEO" for getting access into it. Team captain must enter the details of players. Access to "TORNEO" is given to the captain of the team by providing a username and password. Details of players such as photo, name and mobile number etc. are entered to the site by the team captain. Team can view and edit their profile details and player's details. Team can participate in tournaments conducted by the club. Team can view all the active tournaments and can apply for it. Applying for a tournament became as easy as just pressing a button. After applying for the tournament, team can view the match schedule and also find the result. Everything is automated. Team can also maintain a report of their team members. We can reduce lot of paper work and manual effort by this. Maintaining a detailed report of their played tournament and upcoming tournaments makes the site more useful. Team also can view their tournament history. The history includes details like the coordinator club details, tournament details and result.

SPONSORS

Sponsors register into site by entering their personal details. Sponsors can be an individual, a business organization or a charity trust. They can view and update their details. They can view admin approved tournaments and they can register their sponsorship via site. While registering the sponsorship they must specify the sponsoring item and the quantity of item that he wants to sponsor. The tournament details will be not visible after the day before the tournament starting date. They can also view and approve sponsorship requests from clubs. They can view the details of all tournament that they sponsored, the details like applied teams etc. They can also track upcoming events and history events.

CLUB

Club registers into site by providing their registration certificate and aadhar proof of secretary. Club is provided with a facility to update the details of club secretary to whom we have given the access to the website TORNEO and also the details of the club like club address, email and mobile numbers. Club can conduct tournaments by providing the details of from date and to date, venue, contact number and also application deadline. After the application deadline, club schedules the match. After match, the result is published in the site by the club. They can directly request sponsorship from sponsors. While requesting the sponsorship their registered tournament names are provided as dropdown .Club can request any item from item list and specify quantity. The item can be football, stage, mineral water, food etc. If the item is not available in the list club is provided a facility to add their item.

There is also an option for editing the request after giving the request. Club can also view the details of sponsors who have responded to their request. They can view the details of teams who applied to the tournament and also the details of sponsors who provided the sponsorship. Club can view their tournament history, sponsorship request history and track the status of registered tournaments.
